

Blood Pressure Report

Patient: Test Patient Date: 2026-08-23

Test Name	Result	Unit	Reference Range
Blood Pressure	185/125	mm Hg	80 - 130 mm Hg

Test text is worded 'Blood Pressure' to match the BP_LEVEL regex: `(?i)(.*)Blood(.*)Pressure(.*)`. Value 185/125 mm Hg is used to check whether the PDF-text extraction path for BP produces the same result as the direct SP/DP vitals field path (which was already confirmed to incorrectly return 'Hypertension Stage 2' instead of 'Hypertensive Crisis').
