

Diabetes Panel - 'Worst Result Wins' Rule Test

Patient: Test Patient Date: 2026-08-23

Test Name	Result	Unit	Category (per spec)
Fasting Glucose	90	mg/dL	Normal (< 100)
Average Glucose	110	mg/dL	Normal (< 121)
Plasma Glucose	130	mg/dL	Normal (< 140)
HbA1c	7.2	%	Diabetic (> 6.5)

Three of four values are deliberately Normal, and one (HbA1c) is deliberately Diabetic. Per the documented rule 'the worst result wins - Diabetic beats Prediabetic beats Normal', the expected overall result is 'Diabetic', even though 3 of 4 individual markers are Normal.
